# IT202-450-M2024 - [IT202] Module 1 Getting Started

### Submissions:

Submission Selection

1 Submission [active] 5/26/2024 3:03:16 PM

#### Instructions

A COLLAPSE A

Overview Video: https://youtu.be/3pDB8m62tqM

- Create a repository on github, use the format ucid-course-section as the repository name.
- 2. Make sure it's set to private
- Go to Settings -> Manage Access -> Invite Collaborator -> Search for my ID MattToegel and send
  an invite; if your section has a grader do the same for their github username (refer to course
  announcements)
  - Note: Once in a while the invite doesn't get created correctly and you'll need to resend it, keep an eye on the acceptance of the invite since this is required for further HW validations. A comment will be left on Canvas for the submission if the invite is missing at the time of grading).
- From the terminal / command line create a new branch called M1-GettingStarted
- Create a README.md file and add it to the branch.
- Fill in some basic details:
  - 1. Course/Section
  - Your name (first is fine)
  - 3. Brief info about yourself you'd like to share
- 7. Hint after creating the file
  - git add README.md
  - git commit -m "my readme file"
  - 3. git push origin M1-GettingStarted
  - Create a pull request from this branch (via github.com)
  - Don't merge/close the pull request yet
- 8. Fill in the below deliverables.
- Once finished, ensure it's saved and click the "Export" button.
- 10. Move the generated PDF into your local repository folder at any location of your choosing.

- 11. Do the following commands
  - git add . (this will add all changes)
  - 2. git commit -m "adding output file"
  - 3. git push origin M1-GettingStarted
- 12. Go back to github and merge the pull request that was opened
- Go to Canvas and upload the same PDF that you just downloaded and pushed to GitHub

Note: Having the submission saved and active keeps it eligible for grading.

Branch name: M1-GettingStarted

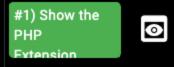

Tasks: 4 Points: 10.00

IDE Setup Evidence (2 pts.) ACOLLAPSE A

ACOLLAPSE A

Task #1 - Points: 1

**Text: Required Extensions** 

Caption (required) ~ Describe/highlight what's being shown showing have the correct PHP extension #2) Show WakaTime Installed and

0

Caption (required) < Describe/highlight what's being shown showing WakaTime installed and time being tracked

#3) Show the MySQL **Extension** 

 $oldsymbol{\circ}$ 

Caption (required) ~ Describe/highlight what's being shown Showing mySQL extension installed

#4) Show the MySQL Side Panel

 $oldsymbol{\circ}$ 

DATABASE @ 50 C # + > 🖯 Information\_schema > 🖰 jed56

Caption (required) 🗸 Describe/highlight what's being shown Showing my database is created

Reflection (6 pts.) ACOLLAPSE A

Task #1 - Points: 1

Text: Talk about what you learned during this module, anything interesting, new, etc.

Should be at least a few sentences for full credit

# Response:

I learned how to set up my GitHub repository for this class and handle my assignment submissions. I also learned about all of the git commands that we use in the terminal in order to sync my changes from local to remote as well as remote to local.

Task #2 - Points: 1

Text: Did you have any issues? If so, how did you resolve them? If no issues, just type "no issues"

# Response:

I did have one issue after I did the Practice-Conflict. I had deleted the branch from my GitHub repository without removing it from my local machine. This made an issue but luckily I checked my git branch to make sure and sure enough I was able to delete it and keep both remote and local in sync.

Task #1 - Points: 1

Text: Add the pull request link here (it should end in /pull/#)

## **URL #1**

https://github.com/jordand2003/jed56-it202-450/pull/3
